Here is What Could Be Fixed by the Taxes on Apple's Offshored Profits - @MotherJones: sanders.senate.gov/newsroom/must-...

The infographic displays the following data:

- Top bar: \$44.7 billion
- GE logo: \$33.7 billion
- Microsoft logo: \$29.6 billion

Text overlay: "around \$21.2 trillion in untaxed profits stashed overseas. About half of that amount is held by 26 large companies like **Apple, General Electric, and Microsoft**. In the midst of massive wealth and income inequality, we need real tax reform. Corporations must

did FEWER traffic accidents when they had NO speed limit!

Speed Limit Paradox. Data collected by the FBI showed that when driving on highways with no speed limiters actually drove safer and slower!

When speed limits were removed, traffic accidents doubled (increased by 111%) on highways with no strict speed laws! How is this possible? It's because when given no regulation on speed, drivers often and were more generous with their use of collisions.

It's not fair to compare any person who might abuse the freedom of carelessness of motorists increases! Read the paradox below!

Cognitive Dissonance

“Sometimes people hold a core belief that is very strong.

When they are presented with evidence that works against that belief, the new evidence cannot be accepted.

It would create a feeling that is extremely uncomfortable, called cognitive dissonance.

And because it is so important to protect the core belief, they will rationalize, ignore and even deny anything that doesn't fit in with the core belief.”

Our food crisis began way before Monsanto.

It began when we stopped caring about where our food came from.

It began when we no longer knew the people that grew our produce and raised the animals we eat.

It began when we stopped cooking and started eating out of boxes and ate fast-food meals in our cars.

It began when we started trusting companies that rely solely on profit to feed us.

Monsanto exists because of our neglect. How we became so disconnected from such an important part of our very being is hard to understand.

It's time to re-connect!

I Was Dying

First I was dying to finish high school and start college.
 And then I was dying to finish college and start working.
 And then I was dying to marry and have children.
 And then I was dying for my children to grow old enough
 for school so I could return to work.
 And then I was dying to retire.
 And now, I am dying ... and suddenly I realize I forgot to
 live.
