Subject: Re: Mitchell brook

Rifle fingerprinted but not swabbed for DNA. Nothing visible on rifle and low likelihood to retrieve touch DNA. Lab strategist did not suggest DNA as the rifle was not fired and the owner of the rifle was already established as being Dunphy

I may have other details on the file but this is the best I can do from memory. Basically we were not trying to ID the owner of the rifle.

Once rifle was analysed by lab DNA testing not considered viable.

Steve

Guys

ASIRT is asking if we DNA tested the weapon. I think I asked Steve before and to my recollection no. I also think there was some rationale behind it. Can either of you provide me something quick here so I can respond to CROPS who will in turn provide ASIRT.

Thks

Pat
